CAREER OBJECTIVE

Dedicated to advancing programming skills and driving organisational growth through continuous learning and effective use of emerging technologies. Focused on refining technical proficiency and teamwork through collaborative projects.

WORK EXPERIENCE

Ether Info Tech

Coimbatore, Tamil Nadu

Java Developer Intern

May 2023 - June 2023

- An intensive internship, gaining practical experience in Java, JDBC and SpringBoot.
- Demonstrated a high level of dedication and professionalism with 100% attendance.
- Received positive feedback for excellent conduct and character throughout the internship.

LEADERSHIP AND INVOLVEMENT

Skill Vertex

Bengaluru, Karnataka

Campus Ambassador

Nov 2022 - Dec 2022

- Led initiatives to promote e-learning on campus, engaging students and driving awareness of online educational resources.
- Enhanced communication and leadership skills by driving campus-wide initiatives and collaborating with peers.

PROJECTS

Crypto Currency Price Prediction Using Random forest and KNN Technique - Implemented a predictive model combining Random Forest and K-Nearest Neighbors (KNN) algorithms to forecast cryptocurrency prices based on historical market data. The project focused on improving prediction accuracy to assist traders in making informed decisions. Tech stack - Python, Scikit-Learn, Pandas, NumPy.

Roof Top Solar Panel Installation Using U-Net Architecture - Developed a deep learning model utilising the U-Net architecture to accurately segment rooftop solar panels in satellite imagery. This project aimed at enhancing the precision and automation of solar panel identification for efficient maintenance and monitoring. Tech stack - Python, TensorFlow, PyTorch, OpenCV.

Sensor-Based Irrigation Automation - Developed an automated water management system to enhancing agricultural productivity through precise water resource management. The system integrates sensors with Arduino Uno to automate irrigation, ensuring optimal resource utilisation. A user-friendly mobile application allows farmers to manage and monitor irrigation processes remotely, improving efficiency and sustainability in water usage. Tech stack - Sensors, Arduino Uno, C++, IoT Integration, Arduino IDE, Mobile Development.

Professional Dynamic Portfolio - Designed and developed a dynamic portfolio website with an integrated admin panel for performing CRUD operations. The website allows for real-time updates, showcasing projects, skills, and achievements in an interactive and visually appealing manner. Redux was used for state management, and APIs were integrated to handle backend data communication. Tech stack - React.js, Redux, Node.js, Express.js, MongoDB, REST APIs, HTML5, CSS3, JavaScript, Tailwind CSS.

SKILLS

Languages: C, C++, Java, Python, MySQL.

Technical Skills: Data structures and Algorithms, Computer networks.

Tools: Git, Github, MongoDB, VS Code, MS Office Suite, Figma, Blender, Canva.

Web Development: HTML5, CSS3, JavaScript, Express.JS, React.JS, Node.JS, Bootstrap, Tailwind CSS.

EDUCATION

Sri Krishna College of Engineering and Technology

Master's of Technology in Computer Science and Engineering
(5 years Integrated)

Coimbatore, Tamil Nadu

Cumulative GPA - 8.08

SVN Matric.Hr.Sec. School

HSE

SSLC

Erode, Tamil Nadu

Percentage - 91%

Percentage - 81.6%

CERTIFICATES

- Data Structures and Algorithms using Java (NPTEL Elite) – Scored 72%.
- React Workshop – CDW (STEP Program).
- C++, Python and Web Development - Udemy.
- Various Certificates from Infosys, Oracle, Cisco and ICT Skillathon.

ACHIEVEMENTS

- TopCoder`21 "The Battle for Programming Supremacy" - **Winner**
- Project Expo`22 TECH TREK - **Runner**
- Problem Solving Badges - Solved 500+ problems on Leetcode and HackerRank

HONOURS AND AWARDS

- Smart India Hackathon`23 - Participant
- Project Expo`21 IGNITE - Participant
